THE

MODEL SEWING MACHNE.

From the New York Herald.]

Prominent among the mechanical triumphs of this most ingenious age, common honesty compels us to notice the Empire Sewing Machine, commended as just-ly styled perfection itself. Useful as have been the various sewing machines, from time to time presented to the public, each one of them has been cursed with some radical defect, which detracts from general utility. Warned by the experience of his predecessors, the inventor of the Empire Machine has produced an instrument, combining all the advantages for which others are vaunted, and obviating every defect which can be attributed to them by the

most fastidious critic. The Empire Macnine is a marvellous combination of simplicity, economy and perfect workmanship, being durable, free frema libility to get out of order, noiseless, and casy of operation. Its mechanical contin vance is such as to secure stability, free dom from accident, and accuracy as to workmanship. By the use of the patented shuttle and straight needle, it makes a stitch, which can neither rip nor ravelwhile, at the same time, it can operate perfectly upon every species of material from leather to cambric, with threads of cotton, linen or silk, from the finest to the

coarsest number. As the Empire Machine is gradually supplanting its more antique rivals, no one in want of a more useful jestrument of this description, be he or she tailor. coachmaker, dressmaker or seamstress, can do otherwise than secure of these economical and inimitable machines, suited alike for family and manufacturing purposes .- The office of the Empire Manufacturing Co. is at No. 536 Broadway, New York City, where they are now supplying these Empire Machines at prices for below this real value of the instruments .-- New Yor
